***Allowable Subject Matter***

1. In response to the instructions filed on 8/30/04, claims 17, 19 and 25 have been canceled.

2. Claims 1-16, 18, 20-24 are allowed.

Independent claims 1-7, 11, and 15 are now directed towards using a encoding difficulty parameter, *derived from I-frame and P(forward) bit data only*, for coding bit allocation in motion compensated coding (I,P,B), wherein the coding selection occurs according to the generated encoding difficulty parameter. This encoding difficulty parameter as recited in the claims now distinguishes applicant's coding process over the Reininger disclosure which takes into account difficulty coding parameters for all three modes (I,P,B), for controlling quantization. Independent claims 16, 18, and 20-24 recite "...wherein the optimum quantization step size has a non-fixed value, and wherein said source video data is always encoded using said predetermined quantization step and said optimum quantization step in which the predetermined quantization step size is always different from the optimum quantization step size..." which is a feature that is not anticipated nor obvious over the art of record. Dependent claims 8-10 and 12-14 are allowable for the reasons discussed above.

***Conclusion***

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andy S. Rao whose telephone number is (571)-272-7337. The examiner can normally be reached on Monday-Friday 8 hours.
